

MEASURING & CONTROL UNITS, DOSING PUMPS

MEASURING & CONTROL UNITS & DOSING FOR PUBLIC SWIMMING POOLS

MaR Infinity OPTIDOS PLATINUM pH+ Rx + Cl + T

Panel for the control and adjustment of pH and chlorine with a potentiostatic probe composed of a multiparameter instrument pH/Rx/Cl/T and 2 proportional to mA signal pumps

Rabat
Group

300504

OPTIDOS PLATINUM

Flow: 8 l/h, Pressure: 6 bar

Other Flow Rates on request !

A

PVC panel with hidden connection line (one only plug out)

- Two ME1-mA electromagnetic proportional pumps driven by controllers
- One MS-MP Multiparametric Controller
- One CG-CL3 Chlorine electrode
- One pH electrode
- Digital display for realtime reading and programming
- Professional programming options
- One 50 microns filter ahead for cleaning incoming water
- Supplied assembled and ready for usage
- Supplied complete with an installation kit
- Low level switch possibility on demand (on both pumps)

Standard accesorry Kit:

- PP Injecton Viton lip Valve - 2x
- PE Injection Tube 2 mt - 2x
- PVC Suction Tube - 2x
- PP Foot Filter - 2x
- PVC Bleed Tube - 2x

Optional:

- PP inj. Pyrex Ball valves with hastelloy spring - 2x

Package: 1050 x 660 x 260

Weight: 15 kg

MaR Infinity OPTIDOS PLATINUM CONNECT pH, Rx, Cl + T

Panel for the control and adjustment of pH and chlorine with a potentiostatic probe composed of a multiparameter instrument pH/Rx/Cl/T and 2 proportional to mA signal pumps

For connection: 1 modem Internet/Intranet, 1 PC software

Composition: ME 1 - pH pump, ME1 - Rx pump, pH probe, Redox probe, both type probe holder, buffer solution, cables in IP 65 box, control unit, amperometric cl - probe

COMPLETE MEASURING, REGULATION AND DOSING FOR PRIVAT POOLS

MaR Infinity POOL SILVER pH + Rx

Characteristics

- Pool water monitoring system, supplied with a proportional
- Solenoid (Diaphragm) dosing Pump with an on-board instrument for pH regulation, a proportional to mA dosing pump, control instrument for chlorine, assembled and cabled on a PVC panel, power supplied at 230 VAC.

Composition

- ME1 - pH pump
- ME1 - mA pump
- MSB-Cl chlorine instrument
- pH probe
- Redox probe
- Bath type probe holder
- Buffer solution
- Cables in IP 65 box

- CHECK THE QUALITY OF YOUR WATER FROM ANYWHERE

MaR Infinity OPTIDOS SPEEDYPOOL pH + Rx

- ABS Thermo-formed elegant panel
- Two MP1 Speedy -pH/Rx, dosing pumps with on-board pH/Rx controller.
- Digital display for reading and programming.
- Easy programming and calibration, possible with just two buttons and a digital display.
- T.A.L. security testing system [timed alarm] for possible chemical end or electrode reading defect.
- Plexiglass transparent electrode holder, with a window in the case showing the state of electrodes and water flow.
- A red light back illuminating the electrodes once the product is turned ON .
- Internal tap for water sampling (under the ABS front cover).
- Minimal maintenance required .
- Supplied assembled and ready for usage.
- Supplied complete with an installation kit.

SALT TREATMENT - SWIMMING POOL WATER

ECOMATIC series

Our Natural, Water Sanitizing Process: As the mild salt water passes through the in-line Eco matic cell, elektrolysis converts a portion of the dissolved salt into a pure, effective sanitizer. This is essentially the same effective sanitizer as would result if chlorine was added to the water - but without the potentially dangerous chlorine additives and the obnoxious "chemical" effects commonly associated with manual chlorination - and without the need to handle packaged chlorine. This sanitizer will effectively keep you pool water safe, healthy and crystal clear, by oxidizing (killing) any unwanted bacteria, virus and algae which may be present in the water.

- Environmentally friendly pool water sanitizing system – uses only natural salt
- Efficient & economical system – low power consumption
- Produces sparkling clear, safe pool water – no odors or irritation to eyes and skin
- Low maintenance, convenient, automated unit
- User-friendly controls – simple to set and operate
- Easy to read indicators
- No handling or storing of chlorine
- Voltage: 240 V

Suitable for Pools up to *

* Pool sizing estimates are based on an 8 hour filtration cycle. Pools in hot climates may require a larger unit.

Scope of delivery:

- Electronic control system
- Digital display and LED indicators
- IP34 protection
- High flow rate cell
- High grade U.V. stabilized rust and weather proof cabinet
- Low salt and overload indicators
- Winter switch for cold water operation
- Water flow detector with automatic switch off
- Operates on 230 volts only

UV DESINFECTATION - SWIMMING POOL WATER

EASY UV series

More and more swimming pool owners want crystal-clear bathing water without the chemicals. This is now possible with Easy-UV. It is remarkably effective, environmentally friendly and reliable. UV disinfection is the future of water sterilisation in modern pools.

Operating Principle: UV-C lamps emit shortwave ultraviolet radiation in a wavelength of 253,7 nm.

Benefits At a Glance

- Bacteria, viruses, floating algae, fungi, parasites and other microorganisms are killed
- UV-C light initiates photo-oxidation reactions that destroy chloramines, which are responsible for the unpleasant odour in swimming pools and irritation of the mucous membranes in the nose, eyes, skin and throat. The water remains fresh, clean, clear and retains its natural taste. Healthy minerals are not lost.
- Only minor chemical treatment of the pool is necessary. The risk of disease is thus reduced. You save money and the aging of building materials in and around the swimming pool slows noticeably.
- UV-C disinfection is compatible with all other forms of water treatment.

UV DESINFECTIO series

Funktion description:

With UV-desinfection built-in to the system we can substantially reduce chlorine dosage or limit it on occasional chlorine shock swimming pool disinfection is in progress by means of ultraviolet radiation which is mortal for the most of organisms. Ultraviolet radiation annihilates bacteria, algae, virus, moulds and parasites which are contained in swimming pool water.

Scope of delivery:

Complete apparatus: plastic body with connection PVC d 50, UV tube, control unit.

Technical specifications:

Connection of stainless steel body d50
Material casing
Max. operation pressure 2,5 bar
UV tube lifetime 8000-9000 hours

OZONE for SPAS and private swimming pools

Ozone (O₃) is a gas derived from the recombination of oxygen in the air (O₂)

The third atom of oxygen (O) gives ozone a very high oxidizing power leading to action on:

- organisms and micro-organisms (viruses, bacteria, etc.)
- mineral chemicals (metals, etc.) and organic products (chloramines, bromamines).

For pool treatment, the ozone is used in such a way as to reduce the conventional chemical treatment needed and provide the user with better quality water and improved conditions of comfort.

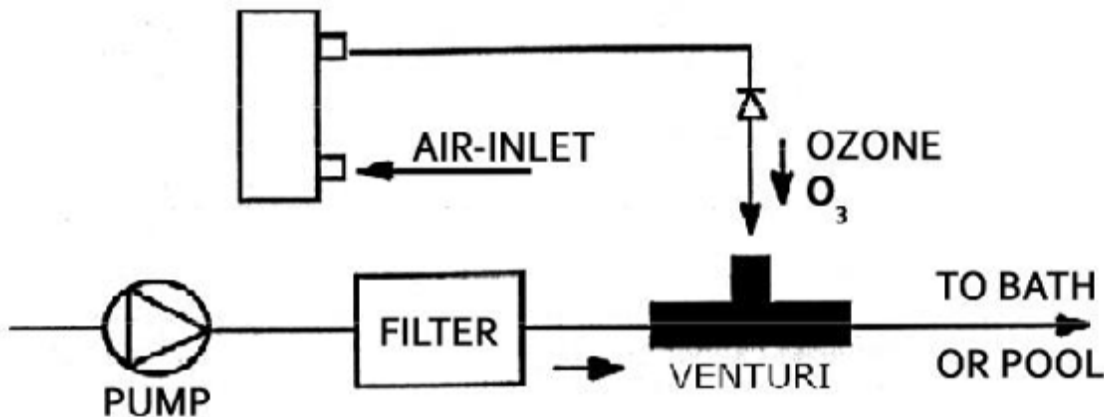

Theory of operation

A flow of ambient air (containing oxygen) is drawn in via a Venturi installed on the water pipe intended for treatment. The air first passes through the PERMOOZONE chamber. The transformation reaction of part of the oxygen into ozone (O₂ → O₃) occurs under the effect of the UV lamp emitting at a wavelength of 185 nm.

The gas leaving the chamber (air + ozone) is then mixed with the water to be treated at the Venturi.

Ozonizers generate enough ozone for most applications as long as the excessive variations that can occur during use do not appear and that the added chemicals such as remanent disinfectant are properly checked, that the pH is adjusted and that the number of users is controlled.

It is important to bear in mind that ozone has no effect on the pH of the water which must be kept under inspection and adjusted accordingly.
